**INF4027W: Information Systems Honours**
**Systems Development Project**
**Iteration 4 Review and Presentation Guidelines – 2026**

# Iteration 4 Presentation – 26th & 27th October 2026

Iteration 4 will be marked based on a presentation, demonstration, code review and documentation element, similar to iteration 2. Times are only guidelines – you can take up to one hour in total.

**Presentation (15 minutes & 25 marks)**

- **Project Overview**
  - Short overview of your client business, problems and opportunities. Vision for the project. Motivate why your project is important.
- **Project Management**
  - Review of iterative project plan highlighting project progress and any revisions to risk assessment and systems architecture.
  - Scrum process
- **Development Methodology**
  - Systems development process followed with work products (UML Diagrams) produced
  - How work is reviewed (walkthroughs and testing)
  - Standards adopted (UI, coding etc)
  - Architecture Diagram
  - Overview of AI use
- **General: Summary of Project Status, issues and concerns**

**Demonstration (30 minutes & 50 marks)**

- **Demonstration of system developed to date**.
  - Iteration 4
    - Complete working application -- deployed
    - There will not be enough time to show every functionality, so plan a storyline to show the application to us in the best light.

**Panel Questions (15 minutes for Iteration 4)**

## Iteration 4 Documentation (25 marks)

Iteration 4 Documentation should include the following elements:

1. Project Background
2. Business Problems
3. Business, Project and Systems Objectives
4. Risk Assessments
5. Updated project plan, revised systems architecture, revised risk assessment, revised iteration plan (highlight revisions). Keep this section short (do not resubmit large sections of your previous presentations).
6. Work products for this iteration include a package diagram, class diagram, use case diagrams, use case narratives, state machine diagrams, database schema (if you use an SQL type of DB-relational), UI mock-ups, test approach (different kinds of tests used) and plan and sample test cases. Please place the test cases in an appendix.
7. Architecture diagram.
8. Description of development approach. We would also like a reflection on how the team benefited from the Scrum approach and the lessons learnt.
9. Progress made in the iteration (sprint) supported by artefacts (sprint backlog, task board, burn down charts, findings from retrospective).
10. Fontsize: Calibri 11; Spacing 1.18; Margin A4; Maximum of 50 to 70 pages
11. The Addendum should contain the following:
    A section highlighting the main aspects that changed in the document.

## A Portfolio of Evidence (User Log)

For this submission, you are required to include a description of each member's contribution. You should also ensure that each team member is given a score out of 5 for the following:

- Coding Contribution /5
- Documentation Contribution /5
- Presentation Contribution /5
- Research Contribution /5
- Meeting Minutes Contribution /5
- Communication Level /5

We do acknowledge that some members will do more in some categories than in other categories, but overall every team member should provide evidence of substantial participation in the team project as a valued member.

# Code Review – Iteration 4 (50 marks) – 28th October 2026

**Code Review for the system developed to date**.

- Included in this section is a review of the architecture, code, database etc.
- We expect each team member to give us an outline of his or her contribution to the project.

A copy of the markers' evaluation sheet has been uploaded on Amathuba (note the mark weightings are only for guidance and may vary given the different project profiles).

# Peer Evaluation

For iteration 4, you are required to rate each members in your group (excluding yourself) with regard to their contribution to your project on a scale of from 1 to 5 using the following criteria:

| | **Ability to Work with the Group** | **Amount of Effort** | **Dependability** | **Intellectual Contribution** | **Overall Contribution to Project** |
|---|---|---|---|---|---|
| 1 | Was disruptive of the group process | Minimal | Almost never turned in anything | Almost never offered anything | Very small |
| 2 | Participated, but wanted to go in a different direction than the group | Less than what was expected | Got things done, but usually late | Occasional input | Minimal |
| 3 | Ok | About what was expected | Usually got things done on time | Was helpful | Average |
| 4 | Always participated, made sure everyone had a chance to participate. | Above what was expected | Almost always got things done on time | Strong contribution | Above Average |
| 5 | Helped get the group moving without dominating it | Did the whole thing (need to explain this) | Always got things done on time | Provided lots of thoughtful, meaningful suggestions | Spot on. |

***Marks will be deducted for team members who were rated poorly by their peers.***

***For Iteration 4 this form will be online on a Google form.***
